

Training Center Facility

Completely renovated in 2009, our Training Center is state-of-the-art and includes 2,800 square feet of space. It features a large training/meeting room that seats 48 people, with a built-in overhead sound system and large-scale projector. Three smaller training rooms are also available.

We are proud to offer use of our Laerdal ALS Simulator mannequin which allows for real-life training scenarios. You can perform and assess relevant medical skills including a life-like pulse and blood pressure, lung sounds, IV placement, intubation, needle decompression, chest tube placement, as well as heart and abdominal sounds.

Facility Rental

Outside agencies and organizations may also use the Henrietta Ambulance Training Center. The facility can be booked for training classes, company meetings and other events. Any agency interested in using the space should contact our Training Department at (585) 334-4190.

About Us

Henrietta Ambulance has been proudly serving the residents of the Town of Henrietta since 1962. We provide EMS coverage to Henrietta and surrounding communities. Our volunteers and employees are certified by New York State to care for the most critical patients with each of our members holding either an Emergency Medical Technician (EMT) or Paramedic certification. Our agency has nearly 100 members and we respond to over 5,400 requests for service each year.

TO REQUEST AN AMBULANCE, **DIAL 9-1-1.**

TRAINING CENTER SERVICES

CPR/AED Training Classes

Henrietta Ambulance is proudly certified as an American Heart Association (AHA) Training Site. Whether you're an individual in the community, a medical professional, or a business owner looking to train your employees in CPR, our staff will work closely with you to setup a training program that allows you or your employees to help others in their time of need.

Classes are typically four hours long and there is no charge for residents of Henrietta to attend. For employees of local businesses or those residing outside Henrietta, a nominal one-time fee will be incurred. All AHA CPR cards are valid for two years.

HENRIETTA AMBULANCE CURRENTLY OFFERS THE FOLLOWING CPR & AED CLASSES:

- **Heartsaver® CPR & AED** – For the general community and employees of local businesses.
- **Basic Life Support for Healthcare Providers** – Basic Life Support for Healthcare Providers - For EMS personnel, Physicians, PA's, Dentists, Nurses/NP's and other healthcare providers.

Classes are held in our state-of-the-art training facility in Henrietta, New York.

We are also happy to come to your office or business to teach on-site.

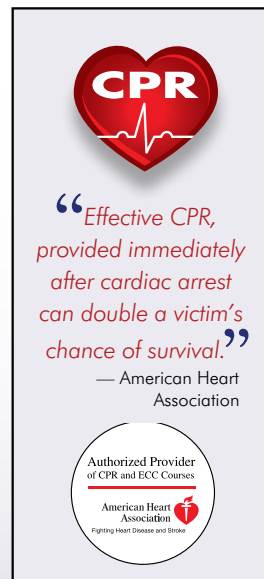

First Aid

The American Heart Association's Heartsaver First Aid course effectively delivers the most comprehensive first aid training in the industry. This four-hour class is tailored

to both employees of local companies as well as the general public. Topics covered include first aid management of common medical conditions including chest pain, bleeding, shortness of breath, stroke and diabetes.

The AHA First Aid class offered by Henrietta Ambulance is held in our Training Center on Calkins Road. However, local business owners may contact us to setup a custom on-site class as needed.

Automated External Defibrillator (AED) Program

Having an AED on-site at your business can greatly increase the chance of survival for an individual in cardiac arrest. Cardiovascular disease is still the number one cause of death in the United States. By choosing to implement an AED program at your facility, you will be making a commitment to saving lives.

STEPS TO SUCCESSFULLY LAUNCHING AN AED PROGRAM AT YOUR BUSINESS INCLUDE:

1. Filing a "Notice of Intent to Provide Public Access Defibrillation" form with New York State.
2. Completion of local documentation including obtaining a medical Physician's approval for installation.
3. Review of legal concerns and considerations.
4. Purchasing and installing the AED.
5. Training employees on proper use of the AED & CPR.
6. Notification to local EMS agencies and 911 center that an on-site AED has been installed.
7. Ongoing training and maintenance of the AED including batteries and supplies.

While Henrietta Ambulance does not currently sell AED's, we do offer a program that assists you in providing options for purchase and installation of your new AED. We'll work closely with you to help facilitate the necessary steps to launch an AED program at your company. We can also provide training to your employees on proper use of the AED, which includes training on CPR and proper 911 activation.

Other Classes

Henrietta Ambulance offers a number of other classes at various times throughout the year including:

- **ITLS** – International Trauma Life Support
- **ACLS** – Advanced Cardiac Life Support
- **PALS** – Pediatric Advanced Life Support

These classes are held for our members and medical professionals in the community. If you'd like to attend one of these programs, contact us to inquire about open seats.

For more information, contact us at 334-4190 or at www.HenriettaAmbulance.org
